A weekly publication for Gallaudet staff and faculty

October 24, 1983 Vol. 14 No. 4

GALLAUDET COLLEGE LIBRARY
WASHINGTON, D. C.

*Connie Knight, coordinator of Professional Training and Health Care Delivery Systems at the National Academy, prepares to go on the air with the audio teleconference.*

# College begins teleconference series

**by Patricia Cinelli**

The National Academy has found a way to make Gallaudet's services available to more people for less money. For the first time ever in the history of the College, Gallaudet will be transmitting over the telephone a four-hour seminar to 19 hospitals in Pennsylvania.

Beginning Oct. 25 Connie Knight, who is coordinator of professional training and health at the National Academy, will begin a four-part teleconference series on "Caring for the Deaf Patient." Knight has adapted material used by the National Academy for in-hospital service seminars to a format that can be transmitted over the phone. "It involves a different arrangement of our materials," explained Knight. Each hospital site received a booklet explaining the material that will be presented in the teleconference and a videocassette called, "Deaf Patients: Special Needs, Special Responses," to be viewed before the series begins.

Participating hospitals also received a set of slides to be used during each of the four sessions. "Since the format (of the audio teleconference) is different from conducting a workshop on site, materials must be more visual so participants can follow the conference through the materials," Knight said. "People need to see the information as we discuss it because we don't have a person there to fill the information in for them."

The presentation of the conference is also different because Knight will not have feedback from the participants in the same way as she would if she were there in person. "For example, during a brainstorming session, we have to allow time for discussion between the hospitals. We don't have the immediate visual contact and feedback," Knight pointed out.

The first session, "Deaf Patients in the Health Care Setting" will be given on Oct. 25. The second, "Identifying Communication Options for Deaf Patients," will be held on Nov. 1. The third, "Establishing Effective Communication with Deaf Patients," will be held on Nov. 3. Knight said that for this session the Pennsylvania Society for the Advancement of the Deaf is working with the National Academy in identifying a deaf person who will be at each of the hospitals receiving the conference. This person will aid participants by demonstrating signs, talking

# Foreign internship program expands

Sivert Haugland teaches deaf students in Oslo, Norway. He works with students between the ages of 13 and 16 at the Skadalen School for the Deaf, in addition to which he works at a home for deaf persons with multiple handicaps.

Because he was interested in gaining more expertise in deaf education and says Norway, a relatively small country with a much smaller deaf population than the United States, is "limited" in what it can offer, he chose to come to Gallaudet.

Over the summer, Haugland, his wife and baby made the trek from his home in Oslo to Gallaudet so he could participate in the International Internship program sponsored by the College's International Center on Deafness.

Said Haugland: "As a teacher of the deaf, this is the best place on earth for me."

Haugland is one of eight interns from around the world who began the non-degree program in August.

The group is the largest ever accepted into the program, said Lou Brown, assistant director of the International Center on Deafness. As the size of the group has grown, Brown said, so too has the internship program itself. For example, this year's group is the first to have attended a five day orientation designed to familiarize members with the campus, the culture, public transportation and the community. This is also the first group of interns to each have both a host student on campus and a host family in the area. While an intern does not live with the host family, the family serves to help the intern learn more about U.S. culture and feel less isolated during his stay.

Most interns live in campus dormitories. However, those, like Haugland who bring their families with them, live off campus, Brown said.

They come to Gallaudet for advanced training in deafness-related fields. "They're looking for advanced knowledge in their specific fields which they might not be able to find in their home country," she stated.

This year's group of interns—five men and three women—range in age from the early twenties to the late forties. They hail from Switzerland, Costa Rica, Ethiopia, Egypt, Australia and Norway. They are teachers, psychologists, school directors and principals—each taking a program designed to meet their individual needs.

The internships vary in length from one month to one academic year. During that time, the interns will either take a series of courses or be involved in experiences designed to meet their educational backgrounds, orientation to the problems of deafness and familiarity with communication, Brown said.

For example, intern Helena Dinjar is a hearing impaired educator from Zurich, Switzerland, where she works in a dormitory program in a school for the deaf. While at Gallaudet, she is living and working with MSSD students as well as auditing four courses.

Zerihun Hailemariam and Getachew Yeshaneh, teachers of deaf elementary school-aged students in Ethiopia, are auditing graduate level education courses, participating in observations and visiting other programs in the United States during their year-long stay.

Clair Malik, director of a pre-school

# Faculty discusses SimCom exam

During this month's collegiate faculty meeting, faculty members discussed but took no action on a proposal to require an additional test of the Simultaneous Method Evaluation (SimCom exam) to demonstrate competency in the simultaneous method of communication.

The proposal set forth by John Van Cleve, an associate professor of History, would require new faculty members to pass both the expressive and receptive parts of the SimCom test two consecutive times to demonstrate their competency. Currently, faculty members need only pass the exam once.

Following a brief presentation by Van Cleve and some initial discussion, the vote was tabled on a point of order. The point of order was brought up by a faculty member who noted that Committee A, which reviewed and voted against the proposal, did not attach a written report to the agenda for the Oct. 17 meeting.

Van Cleve said he introduced the proposal to better ensure that persons passing the test are indeed competent in the simultaneous method. "I feel the SimCom test is not a perfect way to measure our skills because it varies in difficulty from one test to another," he told faculty members in the filled room. "My fear is that if a new faculty member passes once, it may be a fluke—he may have taken a very simple test. But if we see a person pass twice in a row, it says more."

The proposal, if approved at the next faculty meeting, would not be retroactive.

In a related report, David Tweedie, dean of the School of Communication, discussed how the College can better prepare new faculty members for competence in the simultaneous method.

Tweedie discussed a plan which increased instruction in the simultaneous method from about 220 hours to 500 hours. In addition, he suggested more support be offered through a progress evaluation during a faculty member's second year of appointment and the option of using interpreters to supplement classroom instruction where appropriate.

In other action, faculty members authorized Chairman Catherine Ingold to set up a committee to advise on the use of available space at Hall Memorial Building. John Schuchman, vice president for Academic Affairs, asked that the group be appointed.

Faculty members also decided to continue holding their meetings at HMB rather than move to Ely Center or Elstad Auditorium. The next faculty meeting is scheduled for Nov. 21.

# Fellowship forms now available

The President's Commission on White House Fellowships has opened the application period for the 1984-85 Fellowship year.

Application forms can be obtained from the President's Commission on White House Fellowships, 712 Jackson Place NW, Washington, D.C. 20503 or by calling 395-4522. Applications must be postmarked no later than Dec. 1, 1983.

The White House Fellowship program, beginning its nineteenth year, is designed to provide gifted and highly motivated Americans with firsthand experience in the process of governing the nation. U.S. citizens are eligible to apply during the early years of their careers. There are no basic educational requirements and no special career or professional categories. The Commission seeks candidates of demonstrated excellence in their professional roles as well as significant breadth of interests and community involvement.

During their one-year assignments in Washington, Fellows serve as special assistants to Cabinet Secretaries or senior members of the White House staff. Additionally, Fellows participate in an extensive education program including seminars with top government officials, leading scholars, journalists and private sector leaders.

## Input sought for book

The District of Columbia Public Library staff is currently expanding its booklet "A Deaf Person's Quick Guide to Washington" to include all deaf-related information. The booklet is designed to become the Washington, D.C. reference book for deaf and hearing impaired persons.

Francis Higgins, an expert in deaf history, is working on the project and is seeking input from interested persons. Your help is welcome. For more information, call 727-2255 (TDD) or 727-1186 (voice).

*Maria Waters of the Physical Education department walks through the Shepherd Park neighborhood on her way to work at the Northwest Campus.*

# Audio teleconference series initiated

*continued from page 1*

about being deaf and his or her experiences with the medical profession. "Developing Strategies for Deaf Patients" will be the subject of the fourth session to be held on Nov. 10.

Last March, Knight was contacted by the Coordinating Council for Continuing Education in Health Care Systems at Pennsylvania State University. The Council, which has about 70 member hospitals was organized as an alternative method for providing continuing education programs for personnel involved with acute care community hospitals. Knight submitted a proposal for the teleconference and it was accepted by 19 of the hospitals.

According to an article in "Biomedical Communications" magazine, audio conferencing provides a communication medium that is less expensive than almost all face-to-face meetings at distant locations. Knight has found this to be true. She pointed out that when she recently traveled to York Hospital in Pennsylvania to present a one-day program the travel, course and interpreter fees cost the hospital approximately $1,000.

In comparison, when Knight broadcasts from Gallaudet, the hospitals pay $145, which includes costs of the videocassette and $28 for slides. Equipment rental for transmission is about $60 a month and under $50 per hour to use. Hospitals will have to pay for an interpreter for the third session.

The Coordinating Council of Pennsylvania also has accepted a proposal for another teleconference to be presented in May by Gallaudet personnel. This one is designed for extended care facility staff, senior citizen center personnel, health care and allied health professionals and paraprofessionals who work with senior citizens.

Knight and Harriet Kaplan, assistant professor in the Department of Audiology, will be developing the four-part teleconference series. Knight said that both she and Kaplan have previously presented programs on aging and deafness.

## Training session held

The Division of Communications and Education of the National Institutes of Mental Health sponsored a special training session earlier this month for mental health professionals and advocates at the Hubert H. Humphrey Building of the Department of Health and Human Services.

The Oct. 5 session was timed to coincide with National Employ the Handicapped Week of the President's Committee on Employment of the Handicapped.

Followed by a reception at the Russell Senate Office Building, the session introduced a videotape training series entitled "Approaches in Psychosocial Rehabilitation." The training series consists of eight one-half hour videotapes and examines both the philosophies and the methods used to establish effective independent living skills programs and community support systems for people who have experienced mental illness. A printed User Guide accompanies each videotape.

Cassettes can be obtained in ¾-inch or ½-inch formats, and a series with American Sign Language interpretation insets is available.

For more information, contact the Fellowship Foundation at 5711 South Dixie Highway, Miami, FL 33143.

# Program grows

*continued from page 1*

in Cairo, Egypt, observed classes at Kendall Demonstration Elementary School during her two-month stay at Gallaudet. She returned home this month.

Beate Ohre, a psychology student from Oslo University in Norway, is auditing graduate level courses in the Department of Psychology to gain more knowledge in the psychology of deafness.

Raymond Rosser, principal of a secondary school for the deaf in Adelaide, South Australia, is auditing graduate level classes in the Department of Audiology and will visit other programs around the country.

Gerardo Fonseca-Retana, who returned home to Costa Rica last week, is a psychologist appointed director of Regional Resource Programs on Deafness in San Jose. While here, he audited classes and participated in a seminar on resource centers.

Sivert Haugland's main interest is with multi-handicapped deaf students. While at Gallaudet, the Norwegian is auditing graduate level classes in the education department. Participating in observations and visiting other programs.

The internship program was initiated in 1976, the brainchild of Steve Mathis, the former director of the International Center. Since the program's beginning, 23 interns from 15 countries have participated in it.

# Police arrest car theft suspect

Campus police have arrested a local off-campus suspect charged with the summer theft of a student's automobile from the Benson Hall parking lot. The arrest was made Oct. 6.

This is not the suspect's first arrest on campus, police said, noting that he had been arrested about one month ago for unlawful entry on campus. Police said they expect to place several additional charges against the suspect in connection with other crimes at Gallaudet.

In a related matter, campus police also reported that the two vehicles stolen from campus this year—one over the summer and one earlier in the year—have been recovered. Arrests were made in both cases.

# Sponsored R&D

## Grant/contract deadlines

Provided below are application deadlines of selected federal programs that offer potential grant or contract opportunities for Kendall Green faculty, staff and graduate students. More details on programs of interest can be obtained from the Office of Sponsored Research, x5030 (voice or TDD).

| Deadline | Program |
|---|---|
| 11/01/83 | ED: FIPSE Mina Shaughnessy Scholars Program |
| 11/01/83 | ADAMHA: Prevention of ADM Problems in Children and Adolescents |
| 11/28/83 | ED: SEP Handicapped Education Training Grants |
| 12/02/83 | ED: Minority Institutions Science Improvement Program |
| 12/13/83 | ED: FIPSE Comprehensive Program |
| 02/03/84 | National Institute of Education (NIE): Unsolicited Proposals |
| No Specific Deadline | NSF: Honors Workshops and Materials Development for Pre-College Science and Mathematics |

## Education program

The Fund for the Improvement of Postsecondary Education (FIPSE) of the U.S. Department of Education will announce a FY 1984 deadline of Dec. 13, 1983 for its comprehensive program.

Competition is expected to be keen this year. In FY '83, only 73 new projects were funded out of some 2,300 proposals received under the comprehensive program. According to program officials at FIPSE, approximately $6 million will be available for continuing awards and approximately $5 million for new awards will be granted under the comprehensive programs.

This program provides financial assistance to educational institutions, agencies and organizations to develop programs that encourage reform and innovation in postsecondary education.

FIPSE administers the Mina Shaughnessy Scholars Program and Minority Institutions Science Improvement Program.

For further information, please contact the Office of Sponsored Research or Sven Groennings, director, Fund for Improvement of Postsecondary Education, U.S. Department of Education, Washington, DC 20202, 245-8091.

Gallaudet College is an equal opportunity employer-education institution. Programs and services offered by Gallaudet College received substantial financial support from the Department of Education.

# Advocacy Notes

## National impact

**by Merv Garretson**

• Employer Tax Deductions: Senator Bob Dole (R-Kansas) earlier this year introduced S-120, a bill to provide a $25,000 tax deduction for businesses which remove architectural and transportation barriers to handicapped and elderly people. At a recent hearing on the bill, James Gashel of the American Federation of the Blind urged that the language in the measure be expanded to include communication barriers which he defined as "any form of information or equipment which substantially limits access or comprehension by persons with impaired vision, hearing, or speaking skills."

• National Public Awareness Campaign: Internationally renowned violinist Itzhak Perlman will join with advocates for the disabled in a national public awareness campaign to change negative attitudes about handicapped people. Sen. Dole, Sen. Weicker (R-Connecticut), and Reps. Coelho (D-California) and Pepper (D-Florida) will help sponsor the kickoff benefit concert by Perlman. Proceeds will be used to establish a foundation to continue public awareness activities and support organizations run by disabled people. Perlman has used crutches since contracting polio as a youth. Leading the campaign is the Disability Rights Education and Defense Fund (DREDF), which will set up an advisory board composed mostly of disabled persons, corporate executives, and individuals knowledgeable about foundations.

• Deaf-Blind Center Contracts: Effective October 1, six regional centers serving deaf-blind children and youth are funded for one year at $10,370,000. The contracts, which were awarded by Special Education Programs (SEP) of the U.S. Office of Education, cover technical assistance and capacity building to states for supervisors of deaf-blind programs within the state.

• Section 504 and P.L. 94-142: The Department of Justice and the Presidential Task Force on Regulatory Review, chaired by Vice President George Bush, have decided not to issue a revised set of guidelines for Section 504 of the Rehabilitation Act of 1973. Expressions of concern and comments by disabled people and organizations of the handicapped "provided invaluable insight into the impact of the 504 regulations," according to the vice president. It was felt by the task force and the DOJ that the few areas needing clarification could be handled by the courts and in this manner would provide useful guidance. According to a reliable source in the U.S. Office of Education, it is unlikely the OSERS will continue with its attempt to revise the regulations for P.L. 94-142 following the unprecedented outcry last fall and the more than 30,000 letters of protest.

## Discrimination continues

According to a report from the U.S. Commission on Civil Rights, discrimination against disabled persons continues to be "a serious and pervasive problem" in employment and in the schools and colleges of this country. Commission Chairman Clarence M. Pendleton notes that although we have nearly 30 federal anti-discrimination laws and local and state regulations against discrimination, this situation persists.

At a news conference last month, Pendleton said "the problem is that our society has permitted the erection of barriers, in the form of rules, practices, and attitudes that prevent handicapped people from having a fair chance to participate." He added, "Society's operations, from its sidewalks to its school rooms and its jobs, typically are designed for people whose abilities fall in the 'normal' range and often exclude or seriously disadvantage those with handicaps."

The monograph states that although gains have been made over the past two decades, "the effects and application of handicap civil rights laws are not well understood, and legal analysis and interpretation of such laws are still in the formative stage." One of the problems is the tendency to illustrate severe and extremely expensive cases of accommodation to the disabled. Actually, the majority of adjustments to enable more involvement from disabled people were relatively inexpensive and cost-effective.

The report also mentions that most people have had limited contacts with disabled persons and are not aware of the real abilities or of the nature of the handicaps of various disabled people. Open hostility is now rare, but prejudice against handicapped people continues to be manifested through discomfort, patronization, pity, stereotyping and stigmatization. "Such prejudice involves an overreaction to differing physical and mental abilities that imputes more difference to handicapped people than actually exists."

## Interpreter staff grows to meet campus needs

Gallaudet Interpreter Services now has a staff of six interpreters available to meet the growing needs of the campus population. Bernadette Coughlin, Earl Elkins, Bill Isham and Ronald Coffey are the full-time interpreting staff members of the Service. Nancy DeKorte and Sharon Chasan are part-time interpreters while continuing their studies on campus in the Graduate Linguistics program. Marie R. Taccogna is the coordinator of the GIS and Joyce E. Jackson is the secretary.

Interpreters may be requested for the following services:

- interpreting telephone calls for faculty and staff
- interpreting Gallaudet-sponsored activities on and off campus
- interpreting for graduate students taking a course at one of the member Consortium colleges, and
- translating texts, developing English scripts and doing voice-overs for videotapes produced by the Gallaudet TV studio.

Please note that interpreting services for undergraduate students are handled through a separate service in the Communication Center in Carlin Hall.

GIS, operating within the School of Communication, is located in Room 206 of Dawes House and may be reached at x5634 voice or x5554 TDD.

*Felix S. Williams (left) and Wally Babington (right) are presented W. Lloyd Johns' pledge to the Combined Federal Campaign. Williams and Babington are account executives at the main CFC headquarters in Washington, D.C.*

GALLAUDET COLLEGE

Office of the President

# New logo guidelines almost ready

The first part of the guidelines for the use of the new Gallaudet logo will be ready Nov. 15. Now in preparation by Elaine Costello, Lolly Gilbert and Dan Skripkar of the Guidelines Development Committee, Part I will cover the use of the logo on such items as letterhead, business cards, signs on campus and Gallaudet vehicles.

According to Phoebe Simmons, who is coordinating the development and use of the new logo, departments and offices may order letterhead from the Print Shop after Nov. 15. Paper and envelopes bearing the logo must be in use by Jan. 1, 1984, she said. Simmons also explained that orders for business cards with the new logo may be placed on or after Dec. 1.

The guidelines will be printed and distributed in two parts before the end of 1983. The second part will deal particularly with the use of the logo in publications.

Simmons expects a logo exhibit to be on display in the Ely Center around the middle of November. The exhibit will provide background on the various logos that have been used previously on campus and information on the need for and development of the new logo. It will also show a variety of applications of the logo, which is expected to be a unifying symbol for Gallaudet.

# Halloween party/benefit this week

The Alpha and Omega Chi chapters of Phi Kappa Zeta will sponsor a Halloween party for both adults and children on Friday, Oct. 28 from 7:30 p.m. to midnight at Carlin hall. Games, a mini-haunted house and a pumpkin carving contest will be included in the evening's activities.

Admission is $2.50 for adults wearing costumes and $3 for those without costumes. Children under the age of 17 will be admitted for 50 cents. Proceeds will benefit Otis House, a community home for deaf adults with emotional problems. All donations are tax deductible.

Tickets can be reserved by sending money to Wendy Lange at 5328 85th Ave. Apartment A-10, New Carrollton, MD 20904. The phone number is 577-4659 (TDD).

## College Council announces schedule

The Gallaudet College Council will meet three times from now to January 1984. The Council will meet Wednesday, Oct. 26; Tuesday, Nov. 22; and Wednesday, Jan. 25.

All meetings will be held from 4 to 5 p.m. The Oct. 26 meeting will be held in Room 205 of Hall Memorial Building; the Nov. 22 meeting in Room 60 of the Learning Center; and the Jan. 25 meeting in Room 60 of the Learning Center.

Anyone wishing to have an issue brought before the Council should call Barbara Lynch at x5197 or write a note concerning the issue to their section representative well in advance of the meeting date.

## Exam tapes available

Any faculty member interested in viewing the videotapes of last year's Sim-Com (Simultaneous Method Evaluation) exam can do so by picking them up from the Office of Faculty Training and Orientation in Room US-21 of the Learning Center.

# Eagles clinch conference title

The Eagles, led by fullback Bob Wilkins who rushed 99 yards and scored three touchdowns, defeated Quantico 32 to 0 last Friday, Oct. 14. The victory earned Model its second Tri-State Conference championship in three years. Model (5-1), scored five touchdowns—all by rushing—as the offense churned out a total of 332 yards.

The Eagles defense held winless Quantico to a total of 49 yards and sacked the quarterback seven times. Model has three games left to play. The final home game will be Saturday, Nov. 5 at 2 p.m. in a Homecoming game against Maryland School for the Deaf.

In other sports action, the boys' soccer team lost to Bullis 7 to 0 but bounced back and defeated Harker Prep 2 to 1 to even its record to 4-4.

The girls' volleyball team also split last week, losing to Riverdale Baptist 15-10 and 15-13, but came back two days later and defeated National Cathedral 15-5 and 15-3. The girls had a 7-4 record as of Oct. 13.

# Bison downed by Mercyhurst

The big bass drum that the Bison offense uses was practically silent last Saturday, Oct. 15, as Mercyhurst College in Erie, PA, defeated Gallaudet 69 to 0. Mercyhurst scored 10 touchdowns against Gallaudet.

The Bison, after winning the season's opener, have now lost three straight games by scores of 37 to 13, 45 to 0 and last Saturday's coup de grace.

Meanwhile, the Bison soccer team improved its record to 7-2 with two victories last week. One was a 5 to 3 win over Allegany and the other was a 1 to 0 win by forfeiture over NTID. The soccer team, with three games left to play, is assured of posting another winning season for the eighth consecutive year.

## Aerobics offered

The Department of Physical Education and Athletics is offering three six-week aerobic dance classes at both the main and Northwest campuses.

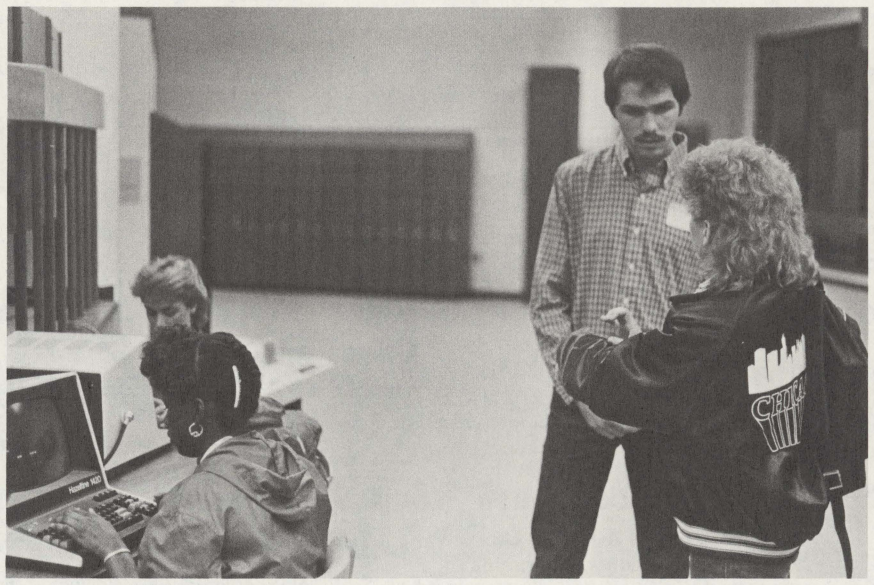

Two classes will be held on the main campus. Both classes will be held on Tuesday and Thursday from Nov. 1 through Dec. 8—one from noon to 1 p.m. at the Hughes Gym and the other from 7 to 8 p.m. in the Adaptive Room of the Field House. The afternoon class will be taught by Gina Oliva and the evening class by Martha Sheridan.

One class will be offered on the Northwest campus. Taught by Gina Oliva, it will run on Mondays and Wednesdays Oct. 31 through Dec. 7. Class hours at the Gym will be from 5 to 7 p.m.

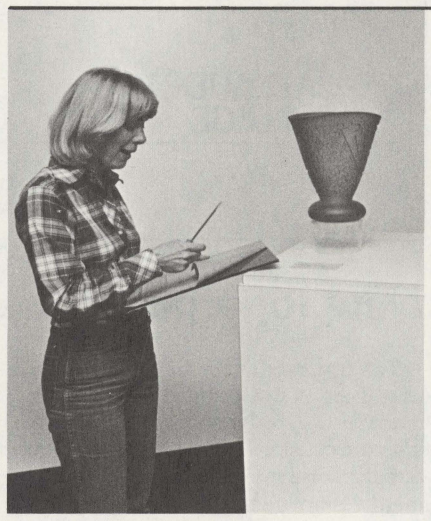

The cost for each class is $8. Registration will be held in class during the first week of instruction.

## Luncheon's a treat

The Alumni House will present a "haunted lunch" complete with treats like witches' stew, goblin vegetable and ghostly cake Oct. 25. Lunch at Ole Jim will be served free to anyone wearing a costume. For all others, the meal will cost $3.95.

*Lisa Johnston, an MSSD student from New Jersey, explains to Jim Morrison, a graduate student at the College, how the school uses computers as an instructional tool. Both students are participating in the MSSD Overview, presented annually to all first-year graduate students in Education to familiarize them with the high school. Graduate students, led by student guides, spent two days touring the building and observing the program.*

*Judy Mannes, the College's art curator, readies the exhibit "The Art of Studio Glass," now on display at the Learning Center.*

# Art display opens

The work of 18 contemporary studio glass artists is presented in the current exhibit at the Learning Center entitled "The Art of Studio Glass."

Studio glass refers to one-of-a-kind glass objects which have been both designed and executed by individual artists. Works in the show represent a variety of techniques such as blowing, casting and laminating.

A lecture and slide presentation by Fritz Dreisbach, one of the artists whose work is on display in the exhibit, will be held today, Oct. 24, at 4 p.m. in Room LN-11 of the Learning Center. Dreisbach, a premier glassmaker, is head of the glass program at the Penland School in North Carolina. A short film on the process of glassmaking will also be shown. A reception will follow from 5 to 7 p.m. and the campus community is invited to attend.

An exhibit of paintings, pastels and engravings by William Baxter Closson has been installed at the Model Secondary School for the Deaf and will run until Dec. 5. Closson, the son-in-law of Edward Miner Gallaudet, worked in all areas of art media but is best known for his engravings.

Other works by Closson can be viewed at the National Museum of American Art in Washington, D.C. They are part of an exhibit entitled "The Capital Image: Painters in Washington, 1800-1915." Several in Closson's paintings were borrowed from Gallaudet College.

The works are now on exhibit at the National Museum of Art, and will be until Jan. 22. Brochures listing a variety of lectures, exhibits and symposia planned in conjunction with this exhibit are available in the College's exhibition areas. The museum will make arrangements for an interpreter if requested.

## KDES presents play

The Kendall Demonstration Elementary School Middle School Eurythmics class of Pauline Spanbauer will present an original Halloween play this week at the school.

"The Halloween Pumpkin" will be performed Thursday and Friday, Oct. 27 and 28 from 1:25 to 2:10 p.m. in the school auditorium.

Orangel Butler, Ocie Curry, Trieu Lang Nguyen, Renee Harris, Chauntice Green, George Brown and Yolanda Smith will act out characters of their own creation in a story of a man who steals a pumpkin from a pumpkin patch.

Elements of drama, dance and sign-singing will be incorporated in the performance. Both performances are open to the campus community.

## Library sale nears

The College Library's annual book sale will be held from Monday, Oct. 31 to Wednesday, Nov. 2 in the upper level lounge area of the Learning Center. The hours will be from 9 a.m. to 11 p.m. on Monday, 8 a.m. to midnight on Tuesday and 8 a.m. to 11 p.m. on Wednesday.

Money collected from the book sale will be used to purchase a new electric typewriter for student use in the library.

## Box office opens

The box office is now open for ticket sales for "Sign Me Alice II." Performances are scheduled for Nov. 4, 5, 11 and 12 at 8 p.m. in Elstad Auditorium.

Box office hours on Oct. 24-28, 31 and Nov. 1-3 are 2-5 p.m.

Tickets can be reserved by calling x5608 TDD or x5605 voice.
